The Portrait of a Lady is one of James's most popular long novels, and is regarded by critics as one of his finest. The Portrait of a Lady is the story of a spirited young American woman, Isabel Archer, who in "affronting her destiny", finds it overwhelming. She inherits a large amount of money and subsequently becomes the victim of Machiavellian scheming by two American expatriates. "The Wings of the Dove" tells the story of Milly Theale, an American heiress stricken with a serious disease, and her effect on the people around her. Some of these people befriend Milly with honorable motives, while others are more self-interested. "The American" is an uneasy combination of social comedy and melodrama concerning the adventures and misadventures of Christopher Newman, an essentially good-hearted but rather gauche American businessman on his first tour of Europe. Marriage, Sexuality, and Gender examines contemporary debates about the meaning and value of marriage. The book analyzes arguments for traditional marriage, including those of neonaturalists, utilitarians, and communitarians or virtue theorists. The volume also considers a range of feminist, welfarist, and liberationist arguments for ending the institution altogether. It evaluates two major reform movements: one focused on expanding marriage to include same-sex couples and the other focused on the use of law to render marriage more internally just. The book concludes with a plea to activists to redirect "marriage equality" movements toward the creation of an entirely secular "civil union law" that would respect a broader range of private life-long commitments, including but not limited to same- and opposite-sex couples, without threatening the role of religious marriage in the lives of those who embrace it and without penalizing nonparticipants.

In the Japanese language the word ‘ie’ denotes both the materiality of homes and family relations within. The traditional family and family house - often portrayed in ideal terms as key foundations of Japanese culture and society - have been subject to significant changes in recent years. This book comprehensively addresses various aspects of family life and dwelling spaces, exploring how homes, household patterns and kin relations are reacting to contemporary social, economic and urban transformations, and the degree to which traditional patterns of both houses and households are changing. The book contextualises the shift from the
hegemonic post-war image of standard family life, to the nuclear family and to a situation now where Japanese homes are more likely to include unmarried singles; childless couples; divorcees; unmarried adult children and elderly relatives either living alone or in nursing homes. It discusses how these new patterns are both reinforcing and challenging typical understandings of Japanese family life.

What Stands in the Way of the Transition to Marriage Among Unmarried, New Parents?

Like the lines of a secret map made dimly apparent by the chemical potion brushed on a piece of paper from a child's detective kit, the outlines of what may be a substantial behavioral biology of human life seem to be coming clear. From genetic science at its most molecular to demography with its assessment of the vital experience of massive populations, there is a growing understanding of the various ways in which the human species reveals underlying commonalities of experience through the life cycle and over the web of interactions that constitutes the basic matter of social life. At the same time, research has been successful in two superficially and contradictory directions: first, in showing the enormous variation in human arrangements and consciousness across and within cultures; and second, in showing the similarity between cultures as far as basic processes of physiology, neurophysiology, and even social life are concerned. But the contradiction only exists in the absence of an understanding of the fact that in a species living under as many ecological, historical, and economic niches as Homo sapiens, cultural variation is what one would naturally expect.

Philosophy

The rugged character and indomitable spirit of the early pioneers of Stephen F. Austins Texas colony had their roots in a turbulent, distant past. From the early 1600s, their courageous ancestors had pushed westward, leaving the European shores to carve out a new nation from the wilderness. They fled religious and political oppression in search of a better life in which freedom was of supreme importance. Many came with tales of their former struggles in Londonderry, Ireland during the great siege, of terrible massacres and clan rivalries in the times of William Wallace and Robert the Bruce, King of Scotland. They vividly remembered the tribulations of Martin Luther and the deadly religious split with the Catholic Church. More recently, memories of their parents participation in the American Revolution, of dramatic, true life scenes such as depicted in the movie The Patriot filled their minds, their fathers having ridden along side of the wily Swamp Fox, Francis Marion. These pioneers associated themselves with men like Travis, Crockett, Houston and Andrew Jackson. Many of these early trailblazers were Scots-Irish and German immigrants. They were on a westward trek to grasp a special prize, to seal Americas Manifest Destiny. And that prize they sought was Texas. From Jamestown to Texas is the story of these intrepid pioneers and their ancestors who cleared and farmed the land, who fought the Indians, battled the elements, and carved out this wonderful country that we have today.

This study examines the transition to marriage among low-income urban mothers and fathers who are unmarried and have a newborn baby together. The study contributes to an emerging body of research that explores the concept of obstacles to marriage by testing whether obstacles to marriage operate in the way that the descriptive literature has proposed: by standing in the way of loving and committed couples who might otherwise make a smooth transition to marriage. Using survival analysis techniques and data from the Fragile Families and Child Wellbeing Study, and introducing a new measure, the Headed to Marriage Index, the study tests the influence that three categories of determinants of marriage--relationship quality, investment in the relationship, and guiding values and beliefs--have on how long couples with a newborn remain unmarried to each other. It also determines whether and how the association between these determinants of marriage and time to marriage is affected by the presence of three obstacles to marriage: low education, poverty, and multiple partner fertility. Results show that the Headed to Marriage Index can be used to estimate hazard of marriage among these couples, and that as a predictor of marriage behavior, this simple index performs nearly as well as the individual components that it comprises. Results also show that low education, being in poverty, and having multiple partner fertility are formidable obstacles that might help to explain why some new parents never marry each other, even though they report wanting to. Finally, interaction terms using the Headed to Marriage Index and each of the
three obstacles to marriage test the hypothesis that the extent to which these obstacles to marriage matter might differ depending a couple's score on the Headed to Marriage Index. The results provided evidence that poverty is an obstacle to marriage for couples at all levels of the Headed to Marriage Index, but that its effect grows stronger as HMI score increases. Poverty is a significant barrier to marriage for those who are otherwise most prepared and oriented toward marriage.

Dominant social work and social care discourses on 'race' and ethnicity often fail to incorporate an Irish dimension. This book challenges this omission and provides new insights into how social work has engaged with Irish
children and their families, historically and to the present day. The book provides the first detailed exploration social work with Irish children and families in Britain; examines archival materials to illuminate historical patterns of engagement; provides an account of how social services departments in England and Wales are currently responding to the needs of Irish children and families; incorporates the views of Irish social workers and acts as a timely intervention in the debate on social work's 'modernisation' agenda. The book will be valuable to social workers, social work educators and students. Its key themes will also fascinate those interested in 'race' and ethnicity in Britain in the early 21st century.

This volume examines the analysis that was designed to map the development of the television family and assess its current state and, at the same time, to provide insight into the tangled relationships between fictional and real family life. In order to do this, the investigation examines the evolution of the American family, paying special attention to the postwar family, which is not only used recurrently as a benchmark for assessing the performance of modern families but also constituted television's first generation of families. The investigation also traces the evolution of the popular family in vaudeville, comics, and
radio. However, the primary focus of the examination is the development of the television family, from families, such as the Nelsons, Andersons, and Cleavers, to more contemporary families, such as the Huxtables, Conners, and Taylors. The unit of analysis for the investigation is the relationship rather than the individual. Hence, the book deals with the portrayal of spousal, parent-child, and sibling relationships and how those portrayals differ across time and across groups defined by ethnicity, gender, and age. Moreover, the relational analysis is expansive so that television family relationships are examined in regard to power and affect, performance, and satisfaction and stability. Television Families provides a thorough summary and critical review of extant research, designed to promote informed classroom discussion. At the same time, it advances a number of hypotheses and recommendations and, as such, is intended to influence subsequent theory and research in the area. The book is intended for senior undergraduate students, graduate students, and television and family researchers.

As African American women left the plantation economy behind, many entered domestic service in southern cities and towns. Cooking was one of the primary jobs they performed, feeding generations of white families and, in the process, profoundly shaping southern foodways and culture. In Cooking in Other Women's Kitchens: Domestic Workers in the South, 1865-1960, Rebecca Sharpless argues that, in the face of discrimination, long workdays, and low wages, African American cooks worked to assert measures of control over their own lives. As employment opportunities expanded in the twentieth century, most African American women chose to leave cooking for more lucrative and less oppressive manufacturing, clerical, or professional positions. Through letters, autobiography, and oral history, Sharpless evokes African American women's voices from slavery to the open economy, examining their lives at work and at home. The enhanced electronic version of the book includes twenty letters, photographs, first-person narratives, and other documents, each embedded in the text where it will be most meaningful. Featuring nearly 100 pages of new material, the enhanced e-book offers readers an intimate view into the lives of domestic workers, while also illuminating the journey a historian takes in uncovering these stories.
